Substances also approved as food additives do not migrate or are contained in marginal quantities only so that they do not display any technological effect in case of migration.

To demonstrate compliance with the overall migration limit for water:

- Distilled water (10 days, 40°C)

The ratio of water contact surface area to volume used to determine the compliance of the material or article is 6 dm²/kg food.

A functional barrier made from plastic is not used in the above mentioned product.

This declaration is valid for the product as described and delivered by us. The verification of compliance was performed based on the rules set out in Regulation (EU) No 10/2011; according to which the product complies with the legal requirements subject to adherence to the stated conditions for the contact with food. In case of deviating water contact conditions, it is up to the user to verify the suitability. A sensory evaluation is not performed; any influence on the organoleptic properties of the packaged water has not been examined.

Nevertheless, we point out that the packer of consumer products is not released from its responsibilities and tests might have to be carried out with the packaged product.
